Connector	2,5mm, 3.5mm jack and snap lock	Impedance	@ 500Hz: 250Ω ± 15% ; @ 1 kHz: 320Ω ± 15%
Eartip	Ear domes, different types available	Sensitivity	@ 500Hz: 101 dB RMS ± 2%
Wax Guard	Cerustop TM		

## The Stealth260 Covert Earpiece

### THE ULTIMATE COVERT COMMUNICATION SYSTEM

The Stealth260 can be incorporated into Titan's 1 or 2-wire kits. The key ingredient in Titan's wire kits is the Snap Lock connector, which enables interchangeable earpieces. The connected cable with PTT stays with the radio, while the earpiece is swapped out at shift change, providing a hygienic solution to employee usage. Titan's 1 and 2-wire kits comes with a high quality speech tuned microphone that provides crystal clear communication. Further, the cable comes in braided fiber material, which provides a stronger and more reliable solution for heavy usage.
